

TELEHEALTH CART VCS-CARE

Superior Care

VCS-CARE is the top-of-the-line telehealth solution to meet all the needs of your demanding healthcare staff. The adjustable stand uses optimal leverage technology for fast, silent and easy one-handed height adjustments to effortlessly change from a standing to sitting position. Perfectly balanced, it reduces shoulder, arm and back fatigue.

Plug-In or Go Mobile

The medical computer operates on either AC power or hot swappable batteries that last for up to 21 hours for greater mobility. Front-locking wheels allows for an even stabler working surface and secured safety. There's even a handy keyboard light to help visibility in low-light settings.

Telehealth Ready

Patients and staff can have full telehealth conversations over video with doctors, specialists or even interpreters to help ensure a thorough understanding of their medical treatments. The PTZ full HD and sharp image camera captures long-distant details, even in larger rooms and cordless Bluetooth microphone and speaker allow staff to move the audio closer to patients who may be hard of hearing or soft spoken.

Access More Tools

Powered by Windows 10 IoT and an Intel core processor, VCS-CARE is ready to be customized to run your medical device programs as well as charge medical peripherals using the computer's batteries. The certified medical grade computer also reduces the spread of harmful germs with a unique antimicrobial plastic casing.
