

TELEHEALTH CART VCS-GO

One-Hand Adjustable Cart

Ideal for maximum productivity, the sturdy yet lightweight VCS-GO is created to glide effortlessly through corridors and around bedsides. Sitting, standing or staff changes are made quickly with the one-hand adjustable workstation. The antimicrobial powder coat finish reduces risk of infection diseases spreading as it moves from room to room.

Mobile Care

Disconnect the tablet from its docking station and take it on patient rounds as a lightweight solution to accessing real-time medical records. The comfortable handle makes it easy for staff to digitally sign documents or scroll through important patient records.

Fast, Secure Information Access

Staff can quickly login and access patient records with the swipe of their ID badge by using the RFID technology and CAC reader, which uses 2-Factor Authentication and Imprivata OneSign.

Antimicrobial Touch Screen and Housing

With unmatched health-conscious features, the medical tablet uses fully antimicrobial plastic housing to ward off harmful pathogens, germs, and bacteria. Antimicrobial housing is more effective than antimicrobial coatings because it lasts longer.

Always-On Operations

Designed to keep up with hectic environments, the rugged state-of-the-art shatter and scratch resistant touchscreen means falls from bedsides and desktops won't be a problem. The medical tablet ensures 24x7 operations with hot swappable batteries to avoid any downtime for charging.

Overall Specifications

Height: 30" to 46"
Wheel Base Width: 16"
Wheel Base Length: 18"
Base Depth: 18"
Weight: 30 lbs.
